Robert Kosieradzki

Backend developer

About me

I am a programmer at the beginning of my professional path. I am a person committed to the tasks I perform, I'm happy to learn new things. I care about further development. I have made several projects that may attract attention.

My projects

Online shop
PHP (Laravel), CSS (Bootstrap), SQl (MySQL), JavaScript
https://github.com/Bobus10/Licencjat
Main page contains filters by price and product categories, page pagination. Shopping cart with necessary functions (changing the number of purchased products and deleting them). Section with completed orders. Admin panel for managing the store with the functions of adding, editing, previewing and deleting products.

To-do list
PHP (Laravel), CSS (Tailwind), SQl (MySQL), Livewire
https://github.com/Bobus10/ToDoList
Adds, deletes and edits added tasks in real time. Completed tasks move to the section with other completed tasks.

Online Test
PHP (Laravel), CSS (Tailwind), SQl (MySQL), JavaScript
https://github.com/Bobus10/Bicycle_card_test
The application displays one question out of several, collecting the selected answers. After completing the test, the user has a preview of all questions with their own and correct answers.
